REMOTE CONNECTIVITY SOLUTIONS

The current COVID-19 restrictions have made travel for technical support challenging

G&G Technical offers several remote connectivity solutions

Contact us today to discuss your specific requirements and a demonstration

Discover Ewon's Solutions for Machine Builder
- A global solution validated by thousands of customers
- ISO 27001 certified for network security

Troubleshoot your PLC remotely
- Establish a secure VPN connection for remote maintenance
- Boost your operational efficiency by getting live with our PLC or HMI in an few clicks
- Reduce costs and optimize engineers' workload by avoiding unnecessary on-site visits
- Provide a faster support and maximize machine uptime

Monitor the performance of your machines at any time, from anywhere, while keeping the data local
- Allow your customers to remotely check on their machines from any device
- Be more proactive by receiving alarm notifications when an anomaly is detected
- Easily integrate the machine data with any enterprise system using OPCUA

Collect Machine Data for your IoT Application
Leverage data for visualization, reporting and analytics
- Unlock new services such as predictive maintenance and OEE optimization
- Improve the efficiency of your data collection by choosing between several available methods

- Reduce the TCO of your IoT project with open APIs

Exor X Platform Overview featuring the eX700 Series HMI
Stop sending your engineers onsite
- Secure VPN Connectivity at no extra cost! No extra hardware needed.
- Firewall Friendly Outbound Connection: Port 1194 "UDP' or 443 "TCP"
- Easy commissioning without local connection
- Remote Viewing and Control, Data logging, KPIs and critical messaging
- Emailing and Alarms

The X Platform unifies all the products and services that fall under the umbrella of EXOR International. From the very smallest building blocks of any IoT project, through the implementation of any of the eight benefits of Industry 4.0 to the requirements of a custom or standard high-performance gateway or HMI, the platform is able to offer the products that you need.

The eX700 Series HMI provides the ultimate all-in-one solution ready for scalable applications across many industries.
- High Performance, High Resolution Glass Cap Touch, Fully Connectable Upstream & Downstream, Powerful Integrated PLC w/ all the Major Protocols
- Integrated VPN with Service Cloud
- **Simple web-based interface allows all your remote devices, networks, and users to be able to communicate seamlessly**.
- **Industry standard encryption technology ensures your stays protected**
- **Granular role-based access permissions**
- A powerful Browser with industry standard Web engine powering state of the art Chromium browser
- A Gateway with up to 3 Ethernet networks, OPC UA pub/sub* Server and Client, with TSN connectivity and multiple protocols
- A PLC with CODESYS V3 can function as a Master through major protocols
- Up to a 5 Year warranty,

Additional X Platforms Include: JSmart, eXware, eSMART Product Series
